DOCUMENT RESUME

ED 133 196 SE 021 772

TITLE	Energy Education Materials Inventory (e.e.m.i.). Part Five: Reference Sources.
INSTITUTION	Energy and Man's Environment Inc., Portland.
SPONS AGENCY	Federal Energy Administration, Washington, D.C.
PUB DATE	Sep 76
CONTRACT	CR-04-60565-00
NOTE	42p.; For related documents, see SE 021 768-772; Not available in hard copy due to marginal legibility of original document
EDRS PRICE	MF-$0.83 Plus Postage. HC Not Available from EDRS.
DESCRIPTORS	*Bibliographies; Educational Programs; Elementary School Science; *Elementary Secondary Education; *Energy; *Instructional Materials; *Reference Materials; Science Education; Secondary School Science; Social Studies

ABSTRACT

This publication is one of a six-part inventory of energy education materials. Included in this part is a listing of bibliographies, computer sources of information, directories, educational programs, funded projects, periodicals, and journals. For each of the materials listed, the following information is included when available: (1) Title; (2) Author; (3) Availability; (4) Cost; (5) Grade Level; (6) Related Materials; and (7) Evaluation of the material. (RH)

****
* Documents acquired by ERIC include many informal unpublished *
* materials not available from other sources. ERIC makes every effort *
* to obtain the best copy available. Nevertheless, items of marginal *
* reproducibility are often encountered and this affects the quality *
* of the microfiche and hardcopy reproductions ERIC makes available *
* via the ERIC Document Reproduction Service (EDRS). EDRS is not *
* responsible for the quality of the original document. Reproductions *
* supplied by EDRS are the best that can be made from the original. *

part five: reference sources

ACKNOWLEDGEMENTS

The EEMI search for energy education materials depended on the active support and contributions of many individuals. The most deserving of recognition--the hundreds that responded to EEMI mailings--must remain unnamed. Regular EEMI advisors, Maggi Rogers, Leslie Wycoff, Dr. Peet Soot and Ray Theiss, provided creative ideas, valuable insight and patience. Special consultant, Dr. Jon Wert, won enduring appreciation for his conscientious work and humor. Tim Crean and Ed Sawyer at the National Energy Information Center distinguished themselves by searching and re-searching computerized data banks. FEA's representative, Rene Vawter, nurtured us with wise counsel and enthusiasm. Her support made the EEMI Project an enjoyable challenge. My personal gratitude and that of the EEMI staff is extended to Dr. John Jones, President of Energy & Man's Environment. His determination, bouyancy and drive gave us all strength. The EME office and field staff endured the disruption and day-to-day crises of this short-term, intensive project with smiles. Mary Madden and Vicki Blair of Blackwell/North America coordinated data processing with insight and sensitivity to the task. Last in this list, but first in my thoughts and feelings, the EEMI staff--Cheryl Glazer, Larry Israel and Noel McInnis. They ultimately did the daily ration of work by maintaining their good spirits with Cheryl's herb teas, Larry's laughter and Noel's not-so-inferior puns. My thanks to all of you. It's been a pleasure.

Ilene A. Wright
EEMI Project Coordinator

September, 1976

Development of these booklets was supported by the Federal Energy Administration, Office of Marketing Education through Contract #CR 04-60565-00. However, no U.S. Government endorsement of the materials included in this Inventory should be inferred. All mistakes and inconsistencies are the sole responsibility of Energy & Man's Environment, Inc.

PRELUDE

Every realm of life is shaped and molded by energy flow
as most people learned rather abruptly
during the winter of energy scarcity, 1973-74.
Rising prices, unemployment, food shortages,
detente, embargo, the politics of the Middle East,
air pollution, brown-outs and 55 MPH signs
continually remind us of our energy-dependent existence
and the complex nature of our energy dilemma.

America's need for the skills and understanding
necessary to resolve energy problems
was met with a deluge of information, contradictory data,
public hearings, impact statements, new laws and judicial decisions.
Disagreements and only slight accord among THE experts
added seasoning and anxiety.
People wondered, "Is this fact?
Or is this opinion and interpretation?"

In the midst of this situation
private and governmental agencies sought
citizen contributions to policy and program formation.
At the same time attitudes toward decision making changed
from THE "right answer"
to "Based on what we know today...."

During three years of grappling with energy-related issues
Americans relearned that information and its meaning change from day to day.
Americans began to recognize
how little they knew,
how much both they and THE experts have to learn,
how rapidly information becomes obsolete,
how quickly yesterday's considered decisions are labeled mistakes.
As a result Americans sought
the perspectives, knowledge and skills
required to meet the challenges of living today.

Educators in every sector responded--no discipline was left untouched!
Using current information, and diverse perspectives and opinions,
educators began to teach the skills young people need
to process and keep up with enduring, evolving controversies
by using energy concerns as the basis for learning experiences.

The ENERGY EDUCATION MATERIALS INVENTORY
is the most comprehensive, available list of resources
for use by K-12 teachers and students
in pursuit of understanding and effective action within
the interdisciplinary energy dilemma.

Hopefully this INVENTORY will encourage
even more productive energy education.

COMMENTARY ON BOOKLET V: REFERENCE SOURCES

WHAT WAS THE EEMI PROJECT? EEMI was designed to produce a thorough inventory of existing energy education materials and reference sources. It is intended that this systematic listing will provide educators with access to resources and will hasten the inclusion of energy-focused learning experiences in educational programs.

HOW IS THE INVENTORY ORGANIZED? There are six parts: Print Materials; Non-Print Materials-Part 1; Non-Print Materials-Part 2: 16 MM Films; Kits, Games and Miscellaneous Curricula; Reference Sources; and Indexes.

WHAT IS A REFERENCE SOURCE? Reference sources provide information and materials that could be developed or adapted for use by K-12 teachers and students.

HOW ARE REFERENCE SOURCES ORGANIZED? Many directories and catalogues cite sources of energy information. These directories and catalogues are listed with addresses in Section I. Reference sources not cited in existing directories are listed in Section II. In both sections the citations are grouped into chapters by type of materials or service available (e.g., all bibliographies are listed together). Within each chapter the citations are listed alphabetically by name or title.

WHAT IS IN A CITATION? Each citation provides the information necessary to initiate contact with the reference source. A typical entry in Section II follows:

1. Name	[1]ANNOTATED BIBLIOGRAPHY ON ENERGY & FOOD
2. Address	[2]ESD 110, C/O SHORELINE SCHS. N.E.
3. Phone number	158TH & 20TH AVE. N.E.
4. Person to contact	SEATTLE, WA 98115
5. Kind of information (general or technical)	[3](206) 362-7900 EXT. 258
6. Level: (of information)	[4]TONY ANGELL/CHRISTINA PETERSON
7. Materials are: (available or in development)	[5]GENERAL INFORMATION
	[6]LEVEL: 7-12, ADULT
	[7]MATERIALS ARE: AVAILABLE

ARE THERE EXCEPTIONS? In Section I only the name/title of the reference source are provided. This information is sufficient to identify these materials at a library or information center. In Section II all the information above is listed when available.

WHO COMPILED THIS INVENTORY FOR FEA? Energy & Man's Environment, Inc. EME is a non-profit corporation serving America's educational communities. EME encourages and supports educators in their efforts to create an energy literate public.

REFERENCE SOURCES

This booklet in the Energy Education Materials Inventory lists sources of information and materials that could be made into curricula by specialists. The Reference Sources entries are recorded in two sections:

1. Section I lists pertinent directories, indexes and information services for each type of reference source. Complete citations are listed alphabetically at the conclusion of Section I.
2. Section II contains individual reference sources that are not included in the directories cited in Section I.

Two reference items deserve special attention:

1. Energy Reference Sources, Bibliographic Series #10 edited by Kitty Hsieh, Oregon State University Press, Box 689, Corvallis, OR 97330. Price $2. This bibliography is valuable for beginning any energy-related search. An up-dated and expanded version called the Energy Reference Update will be available in Fall, 1976. 269
2. An Energy Education/Conservation Plan for Tennessee developed for the State Agency for Title I (HEA) with assistance from the Statewide Energy Education Task Force by John H. Gibbons, Jonathan M. Wert and Nancy E. Collins, May 1976, Environment Center, University of Tennessee, South Stadium Hall, Knoxville, TN 37916. This is the only completed state plan for energy education identified by EEMI.
